AREA OF INTEREST

- Cloud Computing
- Backend Development
- Distributed Systems
- AI-based Security

AWS SKILLS

- Amazon EC2
- Amazon S3
- Amazon EBS
- AWS Lambda
- AWS CloudFormation
- Cloud Architecture
- Deployment Models
- Scalability & Storage

LANGUAGES & WEB

- Python
- Java
- JavaScript
- SQL
- C Programming
- HTML & CSS
- Tailwind CSS

TOOLS & CONCEPTS

- GitHub
- Jupyter Notebook
- Machine Learning
- OOP
- DBMS
- Data Structures

SOFT SKILLS

- Problem Solving
- Analytical Thinking

MALAV SHETH

Target Position: Cloud Computing Intern

CAREER OBJECTIVE

Motivated Computer Science and Engineering student with a strong interest in cloud computing and scalable systems. Supported by hands-on experience in building full-stack, database-driven, and cloud-integrated applications. Looking for an internship in cloud technologies to apply knowledge of cloud infrastructure, deployment, security, and backend development in real-world environments.

EDUCATION

B.Tech — Computer Science and Engineering

Nirma University, Ahmedabad

2023 – 2027 | CGPA: 7.5

Senior Secondary (XII) — Science

Sadhana Vinaymandir, Ahmedabad, Gujarat

2023 | 72.30%

Secondary (X)

Mount Carmel High School, Gandhidham, Gujarat

2021 | 91.10%

TRAININGS / CERTIFICATIONS

AWS — Getting Started with AWS Services Fundamentals for Beginners

Simplilearn — Virtual | March 2026

- Gained foundational knowledge of cloud computing concepts and core AWS services including EC2, S3, Lambda, and CloudFormation.
- Developed understanding of cloud architecture, deployment models (IaaS/PaaS/SaaS), and key AWS tools for storage, computing, and scalability.

PROJECTS

Cloud Log Anomaly Detection System

- Designed a cloud-based system to detect anomalies in user logs using Isolation Forest algorithm.
- Proposed and prototyped use of Generative AI for synthetic attack simulation to improve training data quality.
- Focused on real-time threat detection in cloud infrastructure using ML-based anomaly scoring.

Hospital Management System

- Designed relational database schema for managing patients, doctors, and appointments.
- Implemented CRUD operations using SQL and Python, automating hospital data management workflows.

Recipe Management Web App

- Built responsive web application using HTML, CSS, and JavaScript with local storage-based CRUD operations.
- Added advanced search and sorting features for enhanced usability.

Personal Health Record System

- Developed Java-based system using OOP principles and file handling for secure health record management.
- Ensured robust input validation and modular system design for maintainability.

DNA Sequence Alignment

- Implemented Needleman-Wunsch and Smith-Waterman dynamic programming algorithms.

- ▶ Teamwork
- ▶ Quick Learning

- Compared performance metrics and analysed sequence alignment accuracy across multiple datasets.

ADDITIONAL DETAILS

- Secured 97.2 percentile in JEE Mains — reflecting high academic proficiency and strong problem-solving capabilities in a competitive national-level examination.
